

## S&T

S&T Albania has selected Sphinx to implement an access control and intrusion system at Abramo Group.

The Italian Abramo Group manages in Albania an important call center, with more than 200 employees. For security reasons, they needed a reliable system which allows to control and to manage the working hours and movements of their employees.

To fulfill their commitments, Sphinx has installed 14 swing gates and tripods and more than 20 access control units linked to a time and management system.
