

IMPLEMENTATION OF DIGITAL CAMERA SURVEILLANCE SYSTEM FOR THE CUSTOMS SERVICE AND BORDER POLICE, ALBANIA

Ref: EuropeAid/129640/C/SUP/AL

On behalf of the Albanian Ministry of Finances, the European Delegation has launched an international bid for the implementation of digital camera surveillance system for the customs service and border police in Albania.

The scope of the project was to build a common, combined and modern surveillance system for border police and Albanian Customs Service that can fulfill the actual needs and to be able to handle large number of cameras. The system intends to be a large enterprise system.

In cooperation with Sectron (Macedonia) and S&T Albania, Sphinx has implemented this project.

Based on IndigoVision technology, the system consists in more than 260 IP cameras, 54 IP digital video license & container plate recognition camera systems, 22 NVRs, 167 switches and routers (CISCO) and 12 monitors 55”.
